The distribution was made to each holder of Original Common Stock in whole shares of New Common Stock plus any fractional shares. The total number of shares distributed was 26,142.3530.**

**15** Describe the quantitative effect of the organizational action on the basis of the security in the hands of a U.S. taxpayer as an adjustment per share or as a percentage of old basis ▶ **On July 6, 26,142.3530 shares of New Common Stock were distributed to the holders of 15,682,257.3810 shares of Original Common Stock in a non-taxable IRC Section 305(a) distribution. Each shareholder's tax basis in Original Common Stock shares is allocated between such shareholder's Original Common Stock and New Common Stock in accordance with IRC Section 307(a). As a result, each shareholder's tax basis in the Original Common Stock is reduced by 0.17% and reallocated on a pro-rata basis to the New Common Stock.**

**16** Describe the calculation of the change in basis and the data that supports the calculation, such as the market values of securities and the valuation dates ▶ **See Box 15 above**
